

EDUCATION

<b>MGM's Jawaharlal Nehru Engineering</b> B.Tech in CSE (2019 - 2023)	Chh. Sambhajinagar, India <b>CGPA: 8.58</b>
<b>Deogiri College</b> Higher Secondary Education (2018 - 2019)	Chh. Sambhajinagar, India <b>Percentage: 60.62</b>

SKILLS SUMMARY

- **Languages:** HTML, CSS, Typescript
- **Framework:** React.js
- **Tools:** Figma, Git, Github

WORK EXPERIENCE

**Jio Platforms Limited | Associate QA Engineer** (January 2024 - Present)

- Worked as a QA Engineer for MyJio, Jio.com, and JioTranslate apps, conducting manual and automated testing using Python, Robot Framework, and Selenium.
- Identified and reported defects, collaborating with developers to ensure resolution.
- Performed cross-platform compatibility, performance, and load testing for scalability.
- Designed and executed test cases for functional, regression, and user acceptance testing.

**Swapnil Interprises | Software Developer Intern** (February 2023 - August 2023)

- Worked as a frontend developer for an online food ordering app using ReactJS and TypeScript.
- Designed and implemented UI/UX to enhance user experience and app aesthetics.
- Developed responsive and interactive features, ensuring smooth functionality across devices.
- Collaborated with backend developers to integrate APIs and optimize app performance.

UI/UX PROJECTS

**Mental Wellness Companion App**

- Designed a mindfulness app for stress relief and well-being, conducting user research to identify pain points, create user personas, and map user journeys.
- Developed wireframes, high-fidelity prototypes, and user flows in Figma, refining the app through usability testing.
- Implemented features like personalized recommendations, breathing exercises, and progress tracking to enhance user engagement.
- Designed and executed test cases for functional, regression, and user acceptance testing.

**Smart Home Responsive Dashboard**

- Designed a responsive dashboard for smart home management, focusing on user-friendly controls and seamless navigation across devices.
- Developed wireframes, high-fidelity prototypes, and user flows in Figma, testing for optimal layout and interaction.
- Implemented features like real-time monitoring, device control, and energy usage tracking for enhanced user experience.

CERTIFICATES

- Foundations of User Experience (UX) Design - Google
- Create High-Fidelity Designs and Prototypes in Figma - Google
- Start the UX Design Process: Empathize, Define, and Ideate - Google
- Design Thinking for Innovation
- Figma Essentials Training - LinkedIn
